“ Dennis was a personal close friend of ours for over 20 years. He and Debbie were like family to Linda and I. I considered him my Chiefs soulmate. He was as compassionate about the Chiefs as I am and we always talked about them whenever we were together. Many times Dennis offered me his end zone front row seats to the Chiefs game. Dennis had a childlike soul that loved going to Disney World. When he became a grandfather he was so proud. His pride showed in the sparkle in his eyes and the huge smile he wore when he was with the girls. He was a brilliant man who has left his mark on the world. He has touched more lives than he will ever know. He and Debbie raised 3 wonderful sons. We will miss Dennis. We are so grateful he was a part of our lives. I know he'll be right there cheering on the Chiefs from the best seat in the house. Our hearts go out to Debbie and the rest of the family during this time. May God keep you and bless you all. Love and prayers go out to you @

“ I'm saddened to read of the passing of Dr. Owens. I was a patient for nearly 25 years, following his practice to his several locations over the years. It was shocking to be notified earlier this week, by K.U. Medical Center, that I would need to make an appointment with another physician. No reason could be given to me.

Dr. Owens was a very knowledgeable physician and always an enjoyment to see. We managed to find a little time, during my visit, to discuss the Royals or Chiefs. He will be sadly missed.

“ I was very sorry to hear of Dennis' death. I first got to know him when I worked on the Alcoholism Treatment Unit at Bethany Medical Center in Kansas City, Kansas. In those days he was relatively new in practice with Stan Golan, and I was impressed with his knowledge of psychiatric disorder and appropriate medication. Later, we worked together at Baptist Medical Center on the Psychiatric Unit as well as the Adolescent Treatment Unit in Kansas City, Missouri. I found him to be an extremely competent psychiatrist as well as a very knowledgeable treatment provider for those with dual diagnosis. As a psychologist in private practice he became the psychiatrist that I referred all of my clients to who were in need of psychoactive medication. In fact, I referred my own son to him when he needed medication for an incident of anxiety.

I always found him to be compassionate and caring when it came to patient care. He was also innovative in regard to the area of medication research developing the concept of groups of people who could work with pharmaceutical companies regarding psychoactive drug research. He was always open to ideas and thoughts regarding psychological and psychiatric issues, a true exception in his field. In the years prior to my retirement we would frequently have lunch together. We would discuss professional issues as well as personal thoughts. He was always proud of his family and enjoyed participating with them.

My condolences to them.
